

PitZone Mats

PitZone mat. Inflatable mat to provide firmer landings in a foam dismount pit. Also great used in Freestyle as a "tricking floor"

Product reference: **240PERPZ35**

**Product Details**

The NEW PitZone mat from PE Redskaber is an innovation in gymnastics equipment. The mat has three totally different uses:

- It is designed to be placed on top of a foam filled dismount pit to provide a firmer landing enabling transition training between landing in the foam and landing on dismount mats.
- When used on a hard (smooth) floor such as a sports hall floor or on an artistic sprung floor it becomes a fun "tricking" floor for practising Freestyle Gymnastics or Parkour moves
- On an artistic sprung floor it is a larger version of an airtrack for training artistic gymnastics tumbling.

Supplied in grey with black sides, the PitZone mat is available in two sizes - both 22cm thick:

- 5m x 3m
- 6m x 4m

Each mat has sturdy integral handles to enable it to be carried from the floor to the pit easily.

A Hitachi blower (available at additional cost) is required to inflate the PitZone mat
