Package	Usual Price	Special offer Price	Saving !!
8' (2.4m) high frame	£2,250	£1,800	£450
9' (2.7m) high frame	£2,314	£1,851	£463
10' (3.0m) high frame	£2,379	£1,903	£476

Invented by the founder of Continental, the steel Foldaway remains to this day the UK's most popular, versatile and space saving climbing frame.

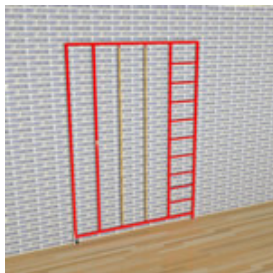

Manufactured from high quality steel tubing and epoxy powder coated in red, blue and yellow (other colours available by arrangement), the Foldaway provides the opportunity required by the National Curriculum for a variety of activities - hanging, balancing, turning upside-down etc.

The gates themselves are available in your choice of 8 different fun and challenging designs - all combinations of design are available at the same price:

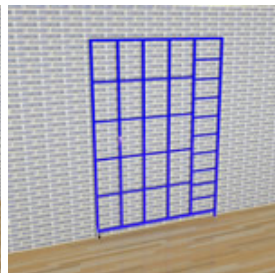

Eight standard gate designs in your choice of three colours

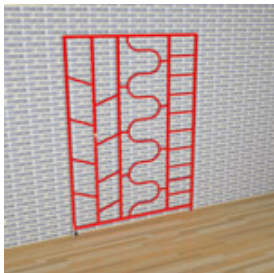

No.1 Linked rings

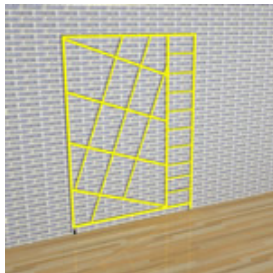

No.2 Ropes

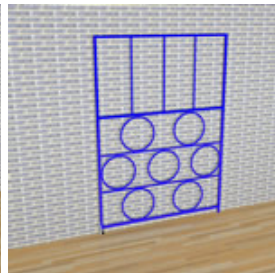

No.3 Window

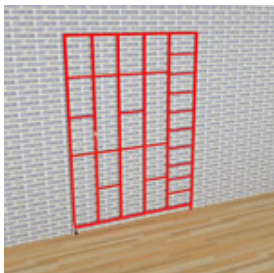

No.4 Snake

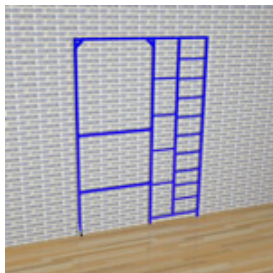

No.5 Diagonals

No.6 Circles

No.7 Rectangles

No.8 Adjustable Poles

Please note:

No.5 Diagonals

This gate cannot be halved.

No.8 Adjustable Poles

This gate cannot be halved or used as the main gate, and is incompatible with the 3-Gate Mat System.

The 3-Gate, which can be fixed in a "Y" or "T" position, comes with 2 stabilising ladders. The frame is available in the following heights:

- Keystage 1 - 2.4m (8')
- Keystage 2 - 2.7m (9')
- Keystage 2 - 3m (10')

The frame has a single wall pivot which can be arranged to span windows and radiators if necessary. Strong shoot bolts secure the frame and no overhead cable is required. The frame folds flat against the wall requiring only 2.3m of wall space.

This package includes a wall fixed ladder which opens up a huge range of possibilities for linking and bridging using the included 2.1m (7') steel bridging ladder. Our [3-Gate Mat System](#) is also included which provides a pack of mats in bright colours to suit all layouts of the frame.

The climbing frame with stabilising ladders, mat system, wall fixed ladder and bridging ladder - everything you get in this package - are shown in the video below:

The set up and arrangement of the frame from folded stored position, into the T-position, half-Y position and Y-position are shown in the video below:

Ideally, double door access is required for installation, but if required the frames can be made for single door access. As the fixings require our installation engineers to drill into the floor, provision must be made in advance if underfloor heating is installed.

We will contact you on receipt of your order to confirm gate design choices, colours and installation arrangements.
